

Mahmoud Ahmed Karash

Flutter Developer

karashmahmoud@gmail.com • +201080823517 • Beheira, Egypt

[LinkedIn](#) • [GitHub](#) • [Portfolio](#)

Summary

Flutter Developer experienced in building scalable Android and iOS applications using Flutter and Dart. Skilled in Clean Architecture, BLoC, REST APIs, Firebase, Supabase, and third-party integrations. Experienced in application development, debugging, performance optimization, testing, and app deployment. Strong focus on clean code, scalability, and problem-solving.

Education

Bachelor of Computers & Informatics at Tanta University, Tanta, Egypt **September 2019 - September 2023**

Built a strong foundation in software engineering, programming, databases, networking, and application development through coursework and projects.

- Completed practical academic projects in software development, databases, networking, and information technology.
- Developed strong problem-solving, analytical, teamwork, communication, and time-management skills through academic projects and group activities.

Experience

Flutter Developer at [MostaqL](#), Freelance (Remote) **January 2023 - March 2026**

Developed cross-platform mobile applications for clients, managing the full lifecycle from requirements and UI development to API integration, testing, optimization, and deployment, delivering scalable and production-ready solutions.

- Worked on 15+ Android and iOS applications using Flutter and Dart, following clean, scalable, and maintainable development practices.
- Integrated 25+ technologies and services, including REST APIs, Firebase, Supabase, payment gateways, push notifications, maps, authentication, and third-party integrations.

Flutter Developer at SHIAKA, Sana'a City, Yemen (Remote) **January 2024 - Present**

Developed SHIAKA mobile application and management dashboard, delivering business features and scalable solutions for mobile and web platforms.

- Integrated Firebase, WebView, web scraping, and multiple payment methods to support core application functionality.
- Built a responsive and adaptive dashboard for order management and tracking, with optimized mobile and web interfaces.
- Tested and optimized mobile and dashboard features, improving performance, usability and maintainability.

Flutter Developer at [CARZLO](#), Sharjah City, UAE (Remote)

January 2024 - Present

Developed CARZLO's mobile application and management dashboard, implementing core features and optimizing the application for production.

- Integrated Firebase, Google Maps, Stripe, REST APIs, authentication, notifications, and third-party services to support core application functionality.
- Built a management dashboard, performing testing, debugging, and feature improvements.

Flutter Developer at Jayek, Riyadh, Saudi Arabia (Remote)

May 2025 - May 2026

Enhanced and maintained 2 applications for customers and barbers by refactoring code, optimizing performance, developing new features, integrating payment solutions, and managing production releases for Android and iOS.

- Refactored and optimized existing code, improving performance, maintainability, code quality, and user experience.
- Integrated Apple Pay, call integration, REST APIs, payment functionality, and third-party services.

Skills

Flutter & Dart: Android, iOS and Web.

State Management: BLoC, Cubit, Provider and Riverpod.

Architecture: Clean Architecture, SOLID Principles, MVVM, MVC and Dependency Injection.

Backend & APIs: REST API, Firebase, Supabase, JSON Parsing and API Integration.

UI/UX & Responsive Development: Responsive UI, Adaptive UI and Animations.

Database & Local Storage: Cloud Firestore, SQLite, Hive, Local Storage and Caching.

Payment Integration: Stripe, PayPal, Apple Pay, Google Pay and Payment Gateways.

Maps & Location Services: Google Maps, Geolocation, Geocoding, Location tracking and Directions & Routes.

Notifications: Push Notifications, Local Notifications and Awesome Notifications.

WebView & Web Scraping: WebView Integration, In-App WebView and Web Scraping.

Deep Linking & App Integration: Deep Linking, App Links, URL Schemes, Third-Party SDKs, and External Services.

Testing & Debugging: Debugging, Error Handling, Unit Testing and Widget Testing.

Performance Optimization: Performance Optimization, Memory Optimization, App Stability, Code Optimization and Performance Monitoring.

App Deployment & Publishing: Google Play, App Store, HUAWEI AppGallery and Amazon AppStore.

Tools: Git & GitHub, CI/CD, Figma and VS Code.

Projects

- CARZLO App • [Google Play](#) • [App Store](#)** **January 2024 - January 2025**
An automotive services platform that connects car owners with car washes, maintenance centers, spare parts providers, recovery services, and car showrooms.
- Guidance | هداية • [Google Play](#) • [App Store](#)** **May 2024 - November 2025**
An Islamic app providing Quran reading and listening, daily Adhkar, accurate prayer times, and essential tools for daily worship.
- Jayek | جايك • [Google Play](#) • [App Store](#)** **May 2025 - May 2026**
A barber booking platform that allows users to book professional barbers at home, track their arrival, and make secure payments.
- Jayek | جايك للحلاقين • [Google Play](#) • [App Store](#)** **May 2025 - May 2026**
A professional platform for barbers to receive customer requests, manage bookings, navigate to clients using live location and maps, and grow their business.
- SHIAKA** **February 2025 - February 2026**
A platform that enables users in Yemen to browse and order a wide range of international products with local payment options, order tracking, and home delivery.
- Drive Mart • [Google Play](#) • [App Store](#)** **February 2023 - August 2023**
A car rental platform that allows users to browse available vehicles, check real-time availability, compare rental options and make bookings.
- Tamrini | تمريني • [Google Play](#) • [App Store](#)** **January 2022 - January 2023**
A fitness and health platform that allows users to find gyms, personal trainers, and fitness programs.

Languages

Arabic - Native

English - Proficient

Certificates

- The Complete Flutter & Dart Development Course from Udemy** **January 2022**
- Flutter Advanced Course (BLoC & MVVM) from Udemy** **April 2022**
- Grocery App with Web Admin Panel from Udemy** **August 2022**
- Deep Dive into Clean Architecture in Flutter from Udemy** **January 2023**
- Mastering Flutter: Responsive & Adaptive UI from Udemy** **September 2023**
- Flutter Payment Integration: Stripe, PayPal & More from Udemy** **January 2024**
